

## Request for Proposal (RFP) – Project X

### Strict Non-Disclosure Instruction (NDI)

This Request for Proposal (RFP) and all associated materials, discussions, and deliverables are strictly confidential. By accepting or reviewing this document, the recipient agrees not to disclose, reproduce, or distribute any part of its contents to any third party without prior written consent from Rittenhouse Communications Group (RCG). All intellectual property, business concepts, and project details contained herein are proprietary and remain the sole property of RCG. Any breach of this confidentiality requirement will result in immediate disqualification from the bidding process and may result in legal action.

### 1. Introduction

Rittenhouse Communications Group (RCG), a leading integrated building technology firm specializing in multi-family, mixed-use, and hospitality projects, invites qualified software development firms to submit proposals for Project X, a next-generation AI-driven virtual engagement platform designed for deployment within MDU (Multi-Dwelling Unit) environments.

Project X aims to merge artificial intelligence, holographic technology, and enterprise building systems to deliver an immersive AI Avatar Concierge experience. The platform will integrate with existing building infrastructure, remote live virtual agents, and enterprise-grade access, video, and property management systems.

### 2. Project Overview

Project X will serve as an intelligent virtual concierge and security platform that operates in both AI Avatar (holographic) and remote live agent streaming modes. The system will act as an interactive communication bridge between tenants, guests, and building management through real-time holographic engagement, live video relay, and advanced data integration.

#### Key Components

- AI-driven virtual concierge avatars capable of natural conversation, context retention, and adaptive learning.
- Holographic projection integration for life-sized, three-dimensional AI interaction.
- Live streaming integration for remote security or leasing agents from an off-site Security Operations Center (SOC).
- Deep integration with building systems and management platforms.

### 3. Scope of Work

#### System Design & Architecture

- Develop a modular, scalable enterprise platform capable of deployment across multiple properties.

- Design a cloud-based backend supporting live streaming, AI inference, and real-time event management.

#### **AI Avatar & Holographic Interface Development**

- Build and train AI avatars with conversational AI models, emotional response mapping, and facial animation.
- Integrate avatars with holographic projection devices and edge computing hardware.
- Ensure seamless transition between AI mode and live-agent streaming.

#### **Systems Integration**

- Develop SDKs and APIs for interoperability with Access Control, Camera Systems, and Property Management Systems (PMS).
- Enable secure data synchronization and event-driven automation.

#### **Security & Compliance**

- Adhere to cybersecurity frameworks (SOC 2, ISO 27001, GDPR).
- Ensure encrypted communication between endpoints, cloud, and local systems.

#### **Testing, Deployment & Support**

- Conduct pilot testing at designated RCG sites.
- Provide documentation, user training, and ongoing technical support.
- Deliver post-launch monitoring, maintenance, and version updates.

### **4. Required Experience & Qualifications**

Respondents must demonstrate:

- Proven experience designing and deploying enterprise software systems for MDU, hospitality, or commercial real estate environments.
- Expertise in AI avatar or holographic interface development.
- Strong background in SDK/API integration with physical security, camera, and PMS platforms.
- Experience with cloud infrastructure, real-time streaming, and IoT frameworks.
- Ability to provide ongoing support, updates, and feature expansion.

### **5. Proposal Requirements**

Proposals should include:

1. Executive Summary
2. Company Overview
3. Relevant Project Experience & Case Studies
4. Technical Approach
5. Proposed Timeline & Milestones
6. Detailed Budget Breakdown
7. Team Qualifications
8. References (minimum of 3 enterprise projects)
9. Confidentiality Acknowledgment

6. Evaluation Criteria

Submissions will be evaluated based on the following weighted criteria:

| Criterion                                 | Weight |
|-------------------------------------------|--------|
| Technical Expertise & Relevant Experience | 30%    |
| System Architecture & Innovation          | 25%    |
| Integration Capability                    | 20%    |
| Timeline & Deliverability                 | 15%    |
| Cost & Value                              | 10%    |

7. Project Timeline & Deliverables

| Phase   | Deliverable                               | Estimated Completion |
|---------|-------------------------------------------|----------------------|
| Phase 1 | Initial Design & Architecture Approval    | 30 Days              |
| Phase 2 | AI Avatar Prototype & Integration Testing | 60 Days              |
| Phase 3 | Pilot Deployment (RCG Designated Site)    | 90 Days              |
| Phase 4 | Feedback Review & Platform Optimization   | 120 Days             |
| Phase 5 | Full Production Rollout                   | 150 Days             |

8. Submission Details

Deadline: [Insert Date]  
Submission Method: Email digital proposal (PDF format) to [insert email address]  
Subject Line: "RFP Submission – Project X"  
Questions & Clarifications: All inquiries must be submitted in writing by [insert Q&A date].

9. Confidentiality & Intellectual Property

All materials developed during the proposal and subsequent engagement phases shall remain the property of Rittenhouse Communications Group. The vendor may not use any portion of the work product or intellectual concepts for other clients without written consent.
